Signals to be made by vessels approaching defended ports when inconvenienced by searchlights.

No. 496 (second publication).—Any vessel approaching a defended port in British India when searchlights are being worked, and finding that they interfere with her safe navigation, may make use of the following signals, either singly or combined :—

Orders and Notifications by the Governor of Bengal, the Governor of Bengal in Council, the High Court, Government Treasury, &c.

ORDERS BY THE GOVERNOR OF BENGAL.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Calcutta, the 5th November 1912.

No. 3355M.—Notice is hereby given that His Excellency the Governor will hold a Levee at Government House, Calcutta, at 9-30 P.M. on Saturday, the 21st December 1912.

The following rules are published for general information:—

I.—The following are entitled to attend His Excellency the Governor's Levee:—

All gentlemen, whether European or Indian, who have been presented at the Court of St. James, or at the Viceregal Court, or at the Courts of the Governors of Madras and Bombay.

II.—The following are eligible for presentation at His Excellency's Levee, whether European or Indian:—

(a) All Ruling Chiefs.

(b) All Commissioned Officers in Civil, Naval, Military (British and Indian), Marine and Volunteer services.

(c) All Gazetted Officers of the first class in Government employ.

(d) All gentlemen who have received titles of honour from His Majesty the King-Emperor, or His Excellency the Viceroy.

III.—Admission to Government House will be by ticket only. Applications for tickets should be submitted to the Military Secretary's Office not later than 10th December, *after which date no applications will be received.* These same tickets will be made use of by the Military Secretary when reading the names to His Excellency the Governor and must consequently be brought to the Levee room. No other name cards will be required.

This rule will not apply to gentlemen who have the privilege of Private Entree, but they are requested to bring with them cards on which their names are typed or very clearly hand-printed.

IV.—Gentlemen, whether European or Indian, who have not already been presented at the Court of St. James or at the Viceregal Court or at the Courts of Governors of Madras and Bombay and who desire to be presented at His Excellency's Levee, should submit their applications through the gentlemen proposing to present them. The latter will apply to the Military Secretary to the Governor for a "form of presentation" which, after the necessary particulars have been filled in by the presentor, will be returned to the Military Secretary not later than Saturday, 7th December, in order that the names may be submitted to His Excellency, when, if they are approved, tickets of admission will be issued.

Gentlemen who present others must themselves attend the Levee.

In the case of all Government officials or gentlemen engaged in business, the presentor should ordinarily be the Head of the Department or Firm.

V.—Only those persons who are declared eligible on account of their social status will be permitted to attend.

VI.—Gentlemen who are entitled *ex-officio* to attend Provincial Durbars may be presented at His Excellency the Governor's Levee by the Heads of their Departments. This will not confer upon them the privilege of attending Levees after they have ceased to hold the position which made them eligible for presentation, nor will it entitle them to present other gentlemen.

VII.—Dress:—

(a) Civil and Military Officers—Levee dress (helmets will not be taken to the Levee).

(b) Clergymen being University Graduates and other gentlemen entitled to wear robes or gowns on account of Judicial or Academical office or status and not entitled to wear uniform will appear in such robes or gowns.

(c) Gentlemen not entitled to wear uniform, or robes or gowns, will appear in Evening Dress.

(d) Indian gentlemen who do not appear in the dress prescribed above will wear Choga, Aba or Jubba and Chapkan, Chilta, Saya or Kaba with trousers and their distinctive National head dress.

(e) In the case of Bengali gentlemen, the head dress should be Pugree, generally known as Shamla or Mouratta, and not a brimless cap.

(f) In the case of Burmese gentlemen, the head dress should be a white fillet, the hair being dressed in a top-knot.

(g) Indian gentlemen who do not appear in the dress prescribed in (a), (b) or (c) should not remove their head dress when they pass His Excellency.

At the Governor's Court only patent leather boots or shoes of an English pattern are allowed to be worn, except in the case of Indian Military Officers who wear the particular style of boots or shoes, which forms part of their uniform.

N.B.—Gentlemen who had intended to be present but have found themselves unable to do so, should submit an explanatory letter to the Military Secretary to the Governor before, or as soon as possible after, the Levee.

By order.

H. B. CHAMPAIN, MAJOR,
Military Secretary to His Excellency the Governor of Bengal.

MUNICIPAL DEPARTMENT.

SANITATION.

DARJEELING, THE 28TH OCTOBER 1912.

RESOLUTION—No. 2342 San.

READ—

Government of India Resolution No. 921-36, dated 23rd May 1912.

Read also—

A report from the Sanitary Commissioner and Sanitary Engineer, Bengal, dated the 29th September 1912, regarding the course of training suitable for Health Officers of the 2nd class and Sanitary Inspectors.

THE Government of India Resolution draws attention to the weakness of the executive establishment of provincial sanitary services and the inadequacy of the staff of trained officers of health, and formulates proposals for a trained sanitary service, chiefly for employment in municipal towns, consisting of two grades of Health Officers and one or more grades of Sanitary Inspectors. The details of the nature of the service, the training and qualifications of candidates and the steps to be taken to ensure their employment in municipalities. have now to be determined.

2. Section 46 of the Bengal Municipal Act leaves the decision as to whether a Health Officer is necessary in a municipality to the Commissioners in meeting, but the advance in public opinion in regard to matters of sanitation and the importance of their bearing on the general prosperity of the province, render it desirable that the Local Government should be empowered to insist, where necessary, on municipalities realizing their responsibilities in the matter. It is proposed, therefore, to amend the Municipal Act so as to enable Government, after due notification, to require a municipality to appoint a Health Officer where this is shown to be necessary, and the offer of the Government of India to provide half the salary of such an officer obviates the possibility of any undue hardship on individual municipalities. The circumstances of municipalities differ widely, and the case of each will be dealt with on its own merits, but it is proposed as a broad rule that every municipality with a population of over 50,000 shall be required to appoint a Health Officer of the first class, and that where the population is over 16,000 and the municipal income is more than Rs. 40,000 a Health Officer of the second class shall be appointed. Municipalities of the second class will, however, be at liberty to appoint a Health Officer of the first class should they wish to do so, and in that case Government will still contribute half the cost of his salary.

3. A candidate to be qualified as Health Officer of the first class must have a registrable medical qualification and, for the present, a British diploma in public health, and it is suggested that the pay of such an officer should ordinarily be Rs. 300—20—500, though it will be open to individual municipalities to offer a higher pay than this, should circumstances in their opinion demand it. It is not intended to form Health Officers into a provincial service or to make their service pensionable ; each municipality will be left to appoint its own officer, subject to the conditions that he is fully qualified under the rules, that he is allowed to join the Municipal Provident Fund and that his appointment and removal are subject to the sanction of the Commissioner of the Division under section 61(*b*) of the Municipal Act. There will probably be no lack of qualified candidates immediately available for appointment as first class Health Officers, and His Excellency in Council trusts that all municipalities with a population of over 50,000, and such others as desire to do so, will at once take steps to appoint Health Officers of the first class.

Provided these officers are fully qualified and the conditions set forth above are complied with, Government will be prepared to make a grant equivalent to half their salary for the remainder of the current year, and this promise is equally applicable to those municipalities who already employ fully qualified Health Officers.

4. The Government of India have defined the main qualifications for second class Health Officers to be a good general education supplemented by a course of training in public health. A medical qualification will not, therefore, be essential, but in view of the fact that it is part of the duties of a Health Officer to deal with disease conditions, and that in regard to the rest of his duties and more particularly the duty of prosecuting offenders against municipal health regulations, his opinion is likely to carry more weight with the public if he is a medical man, His Excellency in Council regards a medical qualification as eminently desirable even in the case of second class Health Officers. It is proposed that ordinarily the pay of such officers will be Rs. 150—10—300 and candidates, unless they possess a diploma in public health, will be required to undergo a training of 12 months, of which two months will be spent in inspecting the working of institutions in Calcutta, one month working with a Municipal Health Officer, two months in the laboratory of the Sanitary Commissioner, and seven months working with a Deputy Sanitary Commissioner. The training will thus be entirely practical, and will be under the direct supervision of the Sanitary Commissioner. If candidates are sent by a municipality for this training no charge will be made, but the candidate's eventual confirmation as a Health Officer will be subject to his obtaining a certificate of competency from the Sanitary Commissioner. In other cases a fee of Rs. 50 will be charged to candidates to cover expenses. Applications to join the training class should be submitted to the Sanitary Commissioner, Bengal, and arrangements will be made to start the training as soon as such applications are received, and a list of candidates who have obtained certificates of competency will be kept by the Sanitary Commissioner for the use of municipalities who are required to appoint Health Officers of the second class. Meanwhile, such municipalities can appoint second class Health Officers if they can obtain qualified candidates on the same conditions as those prescribed above for the appointment of first class Health Officers.

5. As regards Sanitary Inspectors, section 91 of the Local Self-Government Act III of 1885, as amended by Act V of 1908, requires District Boards to appoint properly qualified persons as Sanitary Inspectors unless they are specifically exempted by order of the Local Government, and under section 138 of the same Act the Local Government can prescribe the qualifications of such Sanitary Inspectors, but there are no corresponding provisions in the Municipal Act. It is now intended to extend these provisions to municipalities; as in the case of Health Officers, the circumstances of each municipality will be considered separately, but as a rough working guide it is proposed that all towns with a population of 10,000 shall have one Sanitary Inspector, while two will be necessary where the population is 30,000, and at least three where the population is over 50,000, and in order to prevent undue hardship the Local Government will be prepared to give some assistance towards the cost of these officers in cases where the Commissioner of the Division reports that the municipalities are really unable to bear the increased expenditure.

6. There will be two grades of Sanitary Inspectors, one on a pay of Rs. 50—5—100 and the other on Rs. 100—5—150, and the higher grade will be recruited partly direct and partly by promotion from the lower. As in the case of Health Officers, there will be no provincial service, but each municipality or District Board will recruit for themselves and will admit Sanitary Inspectors to the benefits of their provident funds. The qualifications of a Sanitary Inspector will be mainly character, tact and driving power; his work will be entirely practical, and as it is undesirable that he should regard himself as either an unqualified medical man or a partially trained engineer, theoretical instruction will be avoided except in so far as it is necessary to a full understanding of the practical course. Candidates for the lower grade must have passed the matriculation or the middle vernacular examination, and must produce certificates of good character and a medical certificate of fitness from a qualified medical practitioner. Applications should

be made to the Sanitary Commissioner, and if the applicants are admitted as candidates, they will be required to undergo an eight months' course in practical hygiene and minor Sanitary Engineering under the direct supervision of the Sanitary Commissioner and Sanitary Engineer. The course will consist of :—

I. Hygiene—

(a) a course of hygiene ;

(b) a short course, with demonstrations, on the manufacture and preservation of calf vaccine ;

(c) a course of ten lectures and demonstrations on the common skin diseases and infectious diseases of animals ;

(d) a short course, with demonstrations, on the theory and practice of disinfection.

II. Minor Sanitary Engineering—

(a) drawing office and simple surveying ;

(b) latrines, trenching-grounds, etc.;

(c) elementary principles of building construction ;

(d) elementary principles of water-supply ;

(e) elementary principles of drainage ;

(f) practical demonstration of Sanitary Engineering works in Calcutta and neighbouring municipalities.

Instruction will be given in the vernacular. The vaccination class will be held at Entally and the lectures on the infectious diseases of animals will be given at Belgachia. The Hygiene course will be given by a specially selected Assistant Surgeon, while the Sanitary Engineering instruction will be imparted by the Assistant Sanitary Engineer. The major portion of the work will consist of practical demonstrations in and around Calcutta, but arrangements will be made to place at the disposal of the Sanitary Commissioner and Sanitary Engineer, a room for the purpose of such lectures as are absolutely necessary. As the course is mainly practical, it is essential that the classes should be strictly limited in numbers and each class will therefore be restricted to 30. At the end of the course there will be written and oral examinations, and as far as possible practical examinations conducted by the Sanitary Commissioner and Sanitary Engineer, and the list of successful candidates will be published in the *Calcutta Gazette*. The classes will be started as soon as sufficient applications have been received, and candidates will be required to pay a fee of Rs. 30 for the course.

It is intended that a separate examination, and possibly a further course, shall be prescribed for certificates entitling a Sanitary Inspector of the lower grade to promotion to the higher grade, but it is desired to obtain some experience of the working of the present rules before taking steps to this end. Meanwhile, the Sanitary Commissioner has a list of 10 or 12 young men who have taken courses in England laid down by the Royal Sanitary Institute. These will be most suitable for the higher grade of Sanitary Inspectors, and it is unnecessary to require any further training from them. His Excellency in Council trusts that some of the larger municipalities will take the opportunity of securing at once the services of these men if they are available.

ORDER—Ordered that a copy of this Resolution be communicated to all Commissioners of Divisions, Sanitary Commissioner, Bengal, Sanitary Engineer and Secretary to the Sanitary Board, Bengal, Director of Agriculture, Bengal, and Inspector-General of Civil Hospitals, Bengal, for information and guidance, and that a copy be submitted to the Government of India for information.

Signals to be made by vessels approaching defended ports when inconvenienced by searchlights.

No. 496 (third publication).—Any vessel approaching a defended port in British India when searchlights are being worked, and finding that they interfere with her safe navigation, may make use of the following signals, either singly or combined :—

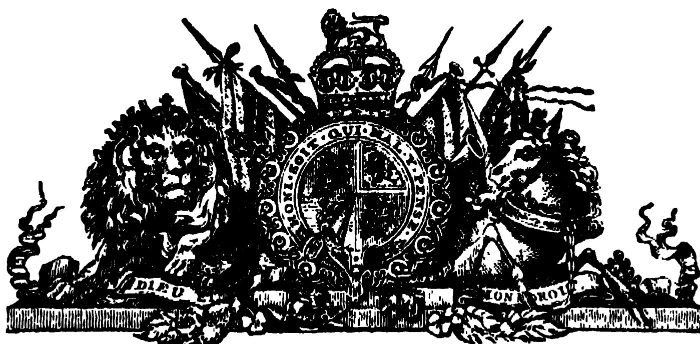
(*a*) By flashing lamp, four short flashes followed by one long flash.

(*b*) By whistle, Siren, or fog-horn, four short blasts followed by one long blast.

Whenever possible, both flashing lamp signals and sound signals should be used.

On these signals being made, the searchlights will be worked so as to cause the least inconvenience, being either doused, raised, or their direction altered.

The signals should not be used without real necessity, as unless the vessel is actually in the rays of a searchlight it is impossible to know which searchlight is affected.



Note.

These signals, which will come into force on the 15th October 1912, are designed to assist Mariners and do not render the Government liable in any way.

Authority.—Government of India.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR SEPTEMBER 1912.

I. *Character of the season.*—During the month under review the rainfall was generally light and much below the normal throughout the Province except in the Chittagong Hill Tracts, where the fall was only slightly above the average. The deficiency was well marked in the districts of the Presidency, Burdwan and Rajshahi Divisions and Mymensingh. The statement showing the rainfall in the several districts of the Province is appended.

II. *Progress of agricultural operations.*—Harvesting of *bhadoi* crops continued and that of jute was well forward. Transplantation of winter rice was completed and weeding continued. The preparation of fields for *rabi* crops commenced in places towards the end of the month.

III. *State of standing crops.*—The condition of standing crops was generally fair, but more rain was wanted throughout the Province for the growth of winter rice, especially in the Presidency, Burdwan and Rajshahi Divisions.

IV. *Prospects and probable outturn of crops.*—Prospects of winter rice were generally fair. The outturn of *bhadoi* crops has been fairly good in most districts.

V. *Damage to crops.*—Some damage was reported to have been done by insects to winter rice crops in the latter part of the month in places in the districts of Khulna and Midnapore.

VI. *Condition of agricultural stock.*—Condition of agricultural stock was on the whole good. Cattle-disease was reported to be prevalent in the districts of the Presidency Division, Burdwan, Midnapore, Rajshahi, Dinajpur, Malda and the Chittagong Hill Tracts, but the outbreaks were confined to particular localities.

VII. *Failure of pasturage and fodder.*—The supply of fodder was sufficient throughout the Province except in parts of Tippera.

VIII. *Prices of food-grains.*—During the second fortnight of the month under review the price of common rice rose in six districts, fell in five and remained stationary in the rest. It varied from 6¼ seers a rupee in Darjeeling to 10$\frac{3}{16}$ seers in Dinajpur.

IX. *Condition of agricultural people.*—The condition of agricultural people continued to be good.

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Winter Rice Crop of Bengal, 1912-13.

(NOTE.—On the average of the five years ending 1910-11, the area under winter rice in Bengal represents some 19·5 per cent. of the total area under rice in British India.)

Character of the season.—The rainfall in April was excessive in Eastern Bengal districts, and not much above the normal in most other districts. In May the fall was slightly defective. The season for the preparation of seed-beds and for ploughing was generally favourable. In June the rainfall was approximately normal with a tendency to defect. The rainfall in July was slightly below the normal in the Burdwan, Dacca and Chittagong Divisions, and was in excess in the rest of the province, but it was on the whole favourable for the transplantation which generally commenced in normal time, although the work was retarded subsequently for a time in parts of the Chittagong Division owing to insufficient rainfall. The rainfall during August and September, though below the normal, was not so unfavourable to the crop as might have been expected, although a little more rain would have benefited the growth of the crop greatly. But for some damage caused to the crop in parts of Rajshahi, Bogra and Dacca, the season has been on the whole favourable and conspicuous by the absence of any great damage such as is frequently caused by floods in July and August.

Acreage.—According to the figures furnished by the District Officers the area sown this year is 15,028,000 acres against 14,963,900 acres last year, or a small increase of 64,100 acres. The normal area under the crop is returned as 16,071,700 acres.

Outturn.—From the summary of the district returns appended, it will be seen that five districts report more than a normal crop, viz., Khulna and Malda, each (125 per cent.). Noakhali (110 per cent.) and Midnapore (106 per cent.). Fifteen districts report a crop between 90 and 100 per cent., six districts between 83 and 88 per cent. and only one district, namely, Rajshahi, reports a crop as low as 75 per cent., being chiefly due to the damage done by floods. According to the District Officers' estimates the provincial outturn works out to 97 per cent. of the normal against 101 per cent. last year.

Director of Agriculture, Bengal.

First Forecast of the Winter Rice Crop of Bengal, 1912-13.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the sowing of broadcasted winter rice commenced this year, and whether that date was early, normal or late.	Date by which the transplanting of winter rice commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.	Last year.	This year.

	Acres.	Acres.	Acres.					
24-Parganas ...	899,700	812,100	827,400	72	95	Middle of June. The sowing was late in Diamond Harbour and normal elsewhere.		The weather and rainfall have all along* been favourable for the growth of the crop everywhere, except in the Barrackpore Subdivision where there was insufficient rain at sowing time. The condition of the crop is poor in Barrackpore, fair in Barasat and good in other subdivisions. The outturn on the whole is expected to be better than last year. The increase in the area sown this year is due to sufficient rainfall.
Nadia ...	136,800	135,300	135,300	83	88	April; normal ...	June; normal ...	The weather and rainfall have been generally favourable, and the condition of the crop is good. The crop is expected to be better this year. As the rainfall has been very favourable, the outturn will not be less than normal.
Murshidabad ...	345,600	337,000	337,900	96	99	Latter part of May; normal.	July; normal ...	The weather and rainfall have been favourable, and the condition of the crop is good. The outturn is expected to be better than last year. The increase in area is due to timely rainfall.
Jessore ...	568,100	478,200	466,400	98	94	April; early ...	......	The weather and rainfall have been favourable, and the condition of the crop is fair. The outturn is expected to be the same as last year. The decrease in area is due to untimely rain which rendered low lands unfit for cultivation.
Khulna ...	855,700	651,200	749,600	94	125	Early part of April; early.	Beginning of August; early.	The weather and rainfall have been favourable, and the condition of the crop is good. The outturn is expected to be above the normal, and better than last year. The area under broadcast rice this year is far less than usual, because the *bil* land was flooded at sowing time. The estimates of this year's area are under scrutiny, and may have to be modified considerably. The area figures of last year are probably far from accurate.
Burdwan ...	874,800	742,200	706,000	85	98	15th April; early	June, early ...	The weather and rainfall have been favourable in Kalna and Katwa for the growth of the crop, but in Sadar and Asansol they were not favourable in the beginning; hence the decrease in area which occurred in the Sadar and Asansol Subdivisions. Transplantation was late in Asansol. The condition of the crop is good in Kalna and Katwa, and fair in Sadar and Asansol. The crop is expected to be better than last year in Sadar and Kalna, equal in Katwa and worse in Asansol.
Birbhum ...	604,600	584,600	498,800	103	83	......	31st July; late ...	The weather and rainfall have not been favourable for the growth of the crop. The condition of the crop is fair. The crop is expected to be worse than last year. The decrease in area is due to want of timely and sufficient rainfall.

	Acres.	Acres.	Acres.					
Bankura ...	507,000	475,000	476,400	83	100	Latter part of May; normal.	Latter part of June; normal.	The weather and rainfall have been favourable for the growth of the crop, except in thana Sonamukhi. The condition of the crop is good, and the outturn is expected to be better this year, except in the above named thana. The increase in area is due to favourable rainfall.
Midnapore ...	1,406,000	1,275,000	1,374,900	84	106	Latter part of April; normal.	Last week of June; normal.	The weather and rainfall were favourable. The condition of the crop is fair in Sadar and Tamluk, and good in Contai and Ghatal. The crop is expected to be better than last year. Timely and sufficient rainfall is the cause of the increase in the area cultivated this year.
Hooghly ...	276,700	234,300	251,200	72	95	15th June; normal	Middle of July; normal.	The weather and rainfall were favourable for the growth of the crop. The condition of the crop is fair, and the crop is expected to be good. The increase in area is due to timely rainfall.
Howrah ...	125,200	98,300	106,600	65	83	End of May; normal.	Second week of July; normal.	The weather and rainfall were favourable for the growth of the crop. The condition of the crop is fair, and the crop is expected to be better than last year. The increase in area is due to timely rainfall.
Rajshahi ...	697,000	502,500	502,300	115	75	Beginning of April; normal.	July; normal ...	The weather has not been favourable, and the growth of the crop is not good. Owing to sudden floods in Naogaon and in thana Tanore of the Sadar Subdivision and to unequal distribution of rain since the time of sowing up till now, the outturn is expected to be below the normal. About half the broadcasted crop has been damaged by floods in Naogaon Subdivision.
Dinajpur ...	1,120,300	945,000	966,000	125	87	May; normal ...	Beginning of July; rather early.	There has been heavy rain throughout, which retarded the transplantation, especially in Balurghat and in some thanas of Sadar Subdivision. The increase in area is due to early rainfall.
Jalpaiguri ...	551,300*	523,000	525,400	120	90	......	Middle of June to middle of July, except in Baikuntpur Estate where the transplantation was late.	The normal area has been revised, owing to revision by the Subdivisional Officer of Alipur Duar, which is under enquiry. The weather was favourable at sowing time, but has not been so subsequently. The outturn is expected to be below the normal, owing to want of seasonable rainfall.
Darjeeling ...	65,200	37,100	37,100	99	100	May; normal ...	June; normal. ...	The weather and rainfall have been favourable. The condition of the crop is good in the hills and fair in the plains. The outturn is expected to be the same as last year.
Rangpur ...	822,800	745,000	746,500	116	92	First part of May; normal.	Middle of June; normal.	The weather has been favourable, and the crop is expected to better than now owing to recent rainfall.
Bogra ...	303,000	303,000	303,000	101	85	Middle of April; normal.	Middle of July; normal.	The weather has been unfavourable. At sowing time there was no rain, and subsequently heavy rain retarded the growth of the crop. Floods also did some damage. Hence the outturn is below the normal.

Pábna ...	566,000	500,000	470,000	105	100	Latter half of March; normal.	Latter half of July; normal.	The weather condition was favourable at sowing time. The rainfall was scanty for some time, but the present condition of the crop is hopeful enough to promise a normal outturn. There has been no flood nor insect-pests. The decrease in area is chiefly due to extension of jute cultivation.
Malda ...	300,000	307,000	309,000	125	125	End of April; normal.	July; normal ...	The weather has been good up till now, and an outturn of 125 per cent. is expected. The increase in area is due to favourable weather.
Dacca ...	633,100	678,300	677,300	96	93	Last part of March; normal.	July; early ...	The weather has been rainy at intervals. Heavy rains impeded the weeding operation, as the plants were under water, and thereby caused some damage to the crop. Hence the outturn is expected to be below the normal. The decrease in area is due to high prices obtained for jute last year and to the weather being favourable for jute cultivation, with the result that a portion of the area formerly under winter rice was sown with jute in Manikganj Subdivision.
Mymensingh ...	1,126,700	971,700	981,700	110	102	Beginning of April; early.	Middle of July; normal.	The weather has on the whole been favourable, and the growth of the crop is good. The increase in area is due to the fact that in Netrokona the jute lands were water-logged in many places and were used for transplanting winter rice in their places.
Faridpur ...	561,000	487,900	428,400	94	87	March and April; normal.	Beginning of July; normal.	The weather was not favourable throughout the district at sowing time. Since then the weather has been fairly favourable. The outturn is reported to be normal in Goalundo Subdivision, but elsewhere it is reported to be below the normal owing to want of timely rain and sometimes excessive rain. The decrease in area is due to the fact that in Gopalganj subdivision a large area could not be sown owing to the water in *bil* areas rising very early.
Bakarganj ...	1,200,000	1,329,200	1,329,000	120	100	Middle of June; normal.	Middle of July; normal.	The weather has been favourable, and the growth of the crop is good.
Chittagong ...	418,400	419,000	419,800	100	90	Ditto ...	1st week of August; normal.	The weather was fair at sowing time, but has not been altogether favourable since then. The growth of the crop was retarded by insufficient rain in Satkania Circle. Some damage has been caused by insect pests owing to insufficient rain. Hence the outturn is apprehended to fa below the normal. The increase in area is due to new settlement.
Tippera ...	724,800	725,000	735,000	95	90	Middle of March; normal.	August; normal	The weather was not favourable at the time of sowing, but has been favourable since. The growth of the crop has been fair. Unfavourable weather at sowing time is likely to cause the outturn to fall below the normal. The increase in area is due to the fact that some areas in which jute plants were damaged by heavy rains were re-sown with winter rice.

Owing to scanty rainfall in July the transplantation was retarded to some extent. The increase in area is due to extension of plough cultivation. The actual area, as ascertained to have been under winter rice in 1911-12, was 22,777 acres, and so 23,000 acres are estimated for this year.

And whereas We are on terms of Friendship and amicable intercourse with each of these Powers, and with their several subjects, and others inhabiting within their Countries, Territories or Dominions:

And whereas great Numbers of Our Loyal Subjects reside and carry on Commerce, and possess Property and Establishments and enjoy various Rights and Privileges, within the Dominions of each of the aforesaid Powers, protected by the Faith of Treaties between Us and each of the aforesaid Powers:

II. The draft rules will be taken into consideration on the 16th December 1912 and any objection or suggestion which may be received by the undersigned through the District Magistrate and the Divisional Commissioner before that date will be duly considered.

Draft Rules

1. So long as the Commissioners deem it practicable and consistent with the maintenance of an efficient water-supply, they may allow any owner or occupier of a masonry building paying a water-rate imposed under the provisions of Part VII of the Bengal Municipal Act, 1884, on the annual value of such building, when such annual value is not less than Rs. 100, to lay down communication pipes from the service pipes of the Commissioners for the purpose of leading water to such building for domestic purposes only, subject to the following rules and conditions.

2. The owner or occupier of any masonry building requiring water to be laid on to such building for domestic purposes, or requiring any addition or alteration to an existing water-supply, must apply for the same on a printed form to be supplied free of cost at the Municipal office.

3. A fee of Re. 1 must be paid to the Commissioners by such owner or occupier for each building connection before any work is commenced, such fee to be in addition to all other costs and charges imposed under these rules.

4. (1) Each building shall have a separate connection from a service main, and extensions from the communication pipe of one building to another shall not be allowed.

(2) A branch main may be allowed to rate-payers applying for the same at their own expense and from the branch main connections to buildings may be extended. Such branch main when laid down shall be the property of the Municipal Commissioners.

5. The owner or occupier of the building in respect of which the connection is required must pay the entire cost of the connection, including the supply and fixing of the fittings referred to in rule 7, and must also pay the cost of such alterations in, or repairs to, roads, drains, sewers, gas or water mains or pipes, and the cost of such other works, as may be necessitated by or result from, the work of making such connection.

6. (1) The work required may at the option of the Commissioners, either be carried out by the Commissioners themselves at the expense of the owner or occupier of the building in respect of which the work is required, or may be carried out by a person or firm employed by such owner or occupier and approved by the Commissioners.

(2) The work must be done under the supervision of an officer appointed by the Commissioners in this behalf, and no connection must be made with the municipal water main except at such time as may be appointed, and in such position as may be selected, by an authorised municipal officer.

7. A building connection shall comprise the following parts of fittings:—

(*a*) a brass or gun-metal ferrule inserted in the main supply pipe;
(*b*) a galvanized iron communication pipe from the ferrule to the meter;
(*c*) a stop-cock and its surface-box;
(*d*) a meter;
(*e*) service pipes from the stop-cock to the taps; and
(*f*) taps.

8. (1) All the fittings referred to in rule 7 shall be exact duplicates of standard samples kept in the office of the Commissioners and approved by them in meeting.

(2) All fittings shall be inspected and tested and stamped by an officer of the Municipality before being fixed.

(3) If any owner or occupier shall desire to adopt any fitting of a pattern different from the standard patterns, he must present such fitting for the approval of the Chairman and any fitting so presented may, if considered satisfactory by the Chairman, be stamped and samples thereof may be purchased and placed among the standard fittings.

9. The size of the ferrule referred to in clause (*a*) of rule 7 shall be decided by the Commissioners, but its diameter shall not differ from that of the communication pipe referred to in clause (*b*) of that rule by more than one-fourth inch.

10. (1) The diameter of the communication pipe shall be determined by the Engineer of the Municipality with regard to average pressure in the main supply pipe at the stand-post nearest to the building for which the connection is required and to the size of the ferrule allowed,

(2) Every communication pipe must be capable of withstanding the pressure of a column of water, 100 feet in height, and must be of a quality approved of by the Engineer.

(3) No more bends or elbows than are absolutely necessary shall be allowed in any communication pipe. No bend by heating and no gradual bend or long sweep such as is likely to cause the pipe to split shall be allowed.

11. (1) The stop-cock and its surface-box shall be placed as near as practicable to the point where the supply pipe enters the building or premises to be supplied, but it must not be within any private premises. The surface-box shall be so designed that it can be locked and the key of it shall remain under the control of the Engineer.

(2) The stop-cock shall be capable of adjustment so that the supply to the building may be regulated thereby.

12. (1) The meter shall be placed as near to the stop-cock as possible and in a position where it can be conveniently examined.

(2) The meter must be fixed in a brick chamber covered over with a cast-iron surface-box of approved pattern.

(3) Subject to the provisions of rule 13 no meter shall be touched or interfered with in any way except with the permission of the Chairman.

13. The Commissioners shall depute an authorised person to read every meter not less than once a quarter, and shall give notice to the occupier at least twenty-four hours before the reading is recorded.

14. If the owner or occupier of any building which is supplied with water under these rules shall refuse or neglect to pay any of the fees or charges imposed in accordance with these rules for a space of fourteen days after he has been served with a notice of demand for the same, the Commissioners may, at any time after the expiration of that period and without further notice, disconnect any pipe forming part of the connection made in respect of such building and may recover the cost of disconnecting such pipe from such owner or occupier:

Provided that the disconnection of such pipe shall not relieve any person from any liabilities which he may have incurred under these rules.

15. (1) Every tap shall be of the same size as the pipe to which it is attached, and shall be of brass and of the pattern known as screw-down. Every tap shall be at least three feet above the road level.

(2) The number of taps in a building shall be fixed in accordance with the annual valuation of such building as follows :—

	Annual valuation of building.	Number of taps.
	Rs.	
Under	300	... 1
From	300 to 499	... 2
From	500 to 1,500	... 3
Above	1,500	... 4

16. Whenever any communication pipe has to be laid across a sewer or open drain or in any place where in the opinion of the Commissioners it is liable to injury or contamination, such pipe must pass through a cast-iron pipe of sufficient length to afford due protection to the communication pipe.

17. No cistern will be allowed to any building of which the annual value is less than Rs. 300. Not more than one cistern connection shall ordinarily be allowed to any building. All cistern connections shall be provided with a ball cock.

18. (1) When a building is within fifty feet of any public drain, a connection from the service pipes shall not be sanctioned unless and until the applicant constructs a drain of masonry work for carrying off the waste water into the said public drain.

(2) In all other cases a connection shall not be sanctioned unless and until the applicant makes provision, to the satisfaction of the Commissioners, for draining away waste water.

19. When the Commissioners are satisfied that any owner or occupier of a building having a connection from the service pipes has wilfully wasted filtered water or has wilfully contravened or failed to observe any of the above rules and conditions they may turn off the water from such building.

20. The owner or occupier of buildings having communication pipes shall not be allowed to store water in masonry reservoirs, except with the special sanction of the Municipal Commissioners.

REGULATIONS FOR THE CONDUCT OF EXAMINATIONS FOR GIRLS' PRIMARY AND MIDDLE SCHOLARSHIPS.

The 11th November 1912.

No. 66 D.—With reference to the Rules for the award of Girls' Primary and Middle Scholarships promulgated under Government Notification No. 5934, dated the 14th October 1912, the procedure for the conduct of examinations shall be as follows :—

I.—PRIMARY SCHOLARSHIPS.

(*i*) On the 31st July of each year, the Inspectresses shall send out a set of printed rolls to each Inspector for distribution to the inspecting staff. The rolls shall be as in appendix A. The Inspectresses shall fill in the subjects and marks to be assigned (or other indications of proficiency, if they consider these preferable) in each subject of the curriculum. They will also send specimens of questions, etc., indicating the standard of examination.

(*ii*) The Inspectors will distribute these documents to their subordinate staff, who will commence to examine on August 15 and complete the examinations by November 30. The examinations will be *in situ* and will be conducted as a part of the ordinary school inspection.

(*iii*) The Deputy or Sub-Inspector will give timely notice to the School Committee (if such exists, otherwise to the head teacher) of the approximate date of the examination. And such Committee (or teacher) will be entitled to present four candidates (whom they consider proficient and who are willing to pay a fee of two annas each) for examination. Their names will be placed on a slip signed by the Chairman of the Committee (or the teacher), which must be ready against the arrival of the Inspecting Officer.

(*iv*) The Inspecting Officer will examine the girls in the presence of any members of the Committee who can arrange to be at the school (in their absence or in the total absence of a Committee, in the presence of a teacher). The examination will be brief and as informal as possible. It should be largely oral, but short papers will be set in those subjects in which the Inspectresses have given instructions that written work is necessary. The subjects will be those of the curriculum, and the books those prescribed within the area. But the examination should aim, so far as possible, at testing the general knowledge of the girls. The papers should be examined,

on the spot, and the names of the two most successful girls will be entered in the roll along with their marks and the opinion of the examining officer. The examining officer will, so far as possible, take into consideration the opinion of the Committee members (or the teacher) in judging the girls' proficiency. But the decision as to success will rest solely with him; and there will be no appeal against this decision.

(*v*) When the examining officer has visited all the schools in his Circle, he will assign an order in column 7 of the roll, and submit the record (if he is below the rank of Deputy Inspector) to the District Deputy Inspector. The record will consist of—

(*a*) the slip signed by the President of the Committee (or head teacher) containing names of candidates;
(*b*) the roll (on which the Deputy Inspector may, if he thinks necessary, make footnote remarks);
(*c*) the answer papers of successful candidates.

(*vi*) At the same time, the examining officer will credit the fees to the Treasury.

(*vii*) The District Deputy Inspector will assign an order in column 8 and make any remarks in column 9 to explain reasons for differing with the examining officer. He will retain the record in his office for six months and will submit to the Inspectress of his Division a copy of the roll containing a number of the successful candidates (not less than 2 nor more than 15) fixed for each district by the Inspectress according to the number of schools in the district and its general needs.

(*viii*) The Inspectresses will make the award of scholarships within their own Divisions, choosing those who, after an examination of the record, appear to them most proficient, up to the number assigned for each district, with the exception of those awarded in the Eden High School.

(*ix*) In the case of the Eden High School, the Lady Principal will conduct the examination, and may, if she finds suitable candidates, award as many as three scholarships.

II.—Middle Scholarships.

The rules for the conduct of the Middle Scholarship examination for girls will be the same, *mutatis mutandis*, as those for the conduct of Girls' Primary Scholarship examination, except that the fee will be 4 annas for the Middle Vernacular and 6 annas for the Middle English examination.

IMPROVEMENT OF DRINKING WATER-SUPPLY IN RURAL AREAS.

MUNICIPAL DEPARTMENT.

LOCAL SELF-GOVERNMENT.

CALCUTTA, THE 11TH NOVEMBER 1912.

RESOLUTION—No. 1518L.S.-G.

READ—

The Proceedings of an informal conference held in Darjeeling on the 9th and 10th October 1912 to consider the question of improving the drinking water-supply in rural areas.
Eastern Bengal Resolution No. 3490-M., dated the 12th June 1911.

Circular No. 8-T.-M., dated the 15th May 1896.
Circular No. 12-T.-M., dated the 20th May 1904.
Circular No. 16-T.—L.S.-G., dated the 4th October 1911.

The importance of a pure water-supply to the health and well-being of the community has been increasingly recognised in this Province during the

last decade, and in recent years, largely owing to the assistance Government has been able to give from the special grants provided by the Government of India for urban sanitation, very considerable progress has been made in the construction of water-works in Municipalities. In rural areas, however, the question is far more complicated; and the greatness of the task, the large expenditure involved, the vast area to be dealt with, and the lack of a central agency to co-ordinate the work done in different districts have combined to paralyse the energies which have been successful in Municipalities. Government has in the past continuously directed attention to the problem and has attempted by prescribing water registers and by promising doles to foster a sustained effort to find a solution. It must be admitted that though something has been done, and in some districts much has been done, the provision of pure drinking water in rural areas remains one of the most pressing needs of the Presidency. In the course of the tours he has made since his arrival in Bengal, His Excellency the Governor has been most strongly impressed both with the keen appreciation on the part of the people of the existence of this want and with the very divergent opinions expressed by the residents in different districts as to the practical means that could be adopted to meet it. His Excellency therefore invited a few gentlemen from different parts of the Province with some of whom he had already discussed the question, to meet in an informal conference in Darjeeling and endeavour by mutual interchange of ideas and experiences to formulate proposals, however tentative, for a general practical advance. His Excellency has read the proceedings of this meeting with the greatest interest and considers that the opinions expressed are very helpful; he desires to record his appreciation of the earnestness and practical zeal which have animated these gentlemen in giving their assistance to Government.

The problem of rural water-supply falls into two main branches, the provision of new sources and the purification and preservation of existing sources, and, while it is admitted that particular localities have their special needs, the evidence accumulated shows that it is to the second branch of the problem that attention should first be directed. While, therefore, the excavation of even one new tank in every village in Bengal—and tanks are held to be the most generally suitable form of water-supply—might well seem a task beyond the resources of the District Boards, it may reasonably be anticipated that these bodies will eventually find means to cope with the question of improving the purity of existing tanks. Where such tanks are already in the possession or under the control of the District Board they can be reserved for the supply of drinking water and are then given the protection of the law as public reservoirs, but these form only a very small proportion of the total number, and it is with reference to the purity of the sources that are under private control that the main difficulty arises. Under the existing law the alternatives open to the District Boards in dealing with these private sources are to acquire them, to offer to maintain them on condition that they are handed over to District Board control, or to contribute the whole or part of the cost of maintenance on such terms as may be considered equitable without actually assuming control. The capital expenditure involved in any programme of acquisition must indefinitely postpone any considerable improvement in the water-supply by these means, and it is in the direction of amicable arrangements with the owners of tanks that the only real hope of any speedy progress lies. Experience has shown that such owners are generally reluctant to part with proprietary rights or complete control over the tanks, and the agreements between them and the District Board have usually taken the form of an undertaking on their part to keep the tank pure in return for a contribution from the District Board towards the cost of re-excavation. Such agreements are difficult to enforce and it is a frequent complaint that they fail to effect their object. It has been suggested, and His Excellency in Council desires to commend the suggestion most strongly to the attention of District Boards, that a more hopeful solution of the difficulty is an agreement whereby the owner in return for a contribution towards the cost of re-excavation or of maintenance would consent to the District Board enforcing by its own agency definite restrictions

to prevent the pollution of the tank. The common causes of contamination of a drinking water-supply are—

(1) Its use for washing, watering cattle, or its defilement by insanitary practices,
(2) Percolation or surface drainage from an insanitary area,
(3) Jute-steeping or other forms of vegetable pollution,

and it would appear to be quite feasible to enforce the restrictions that are necessary to prevent the pollution from these causes of a properly selected tank without necessarily interfering with the fishing rights of the proprietor. Offers have been made by many zamindars to place their tanks on these conditions at the disposal of the public for the supply of drinking water, and His Excellency in Council believes that the experiment promises considerable success, and if this promise is fulfilled, a very substantial advance will have been made towards the solution of the problem.

The setting apart of a tank as a source of water-supply for drinking purposes is not, however, sufficient in itself to prevent its pollution, and the protection given by the law to public reservoirs is inoperative without some agency to set the law in motion. The task of keeping the water pure cannot unfortunately, save in a few more enlightened villages, be left to the good sense of the villagers themselves, and until the villagers have through custom or education attained a recognition of the necessity for respecting their sources of drinking water it will in most cases be necessary to adopt some means of actively guarding the tank, in most cases probably by the agency of the village chaukidar. Where Union Committees have been established under the Local Self-Government Act it may be expected that the gentlemen forming these Committees will be sufficiently interested and enlightened to supervise this, and His Excellency in Council would be glad to see the system of Union Committees extended wherever the elements necessary to their success are present. Though the cost of continuous maintenance, even if a special guard is appointed, will in each village be small, it will in the aggregate form a very considerable burden on the resources of the District Boards, and if it is left to them to provide the money not only will the progress be very slow, but the District Board will be unable to finance the Union Committees for the purposes of sanitation, etc., and the extension of the Union Committee system must be seriously checked. Section 118C of the Local Self-Government Act as amended by Act V of 1908 empowers the Union Committee under certain conditions to levy a small rate, and no more appropriate purpose for the application of such a rate could be found than the continuous maintenance of the purity of the village water-supply. Hitherto the Union Committees of Uluberia, Amta, Bagnan, Jagatballavpur and Domjur in the Howrah district are the only ones that have made use of this section which is not at present in force in the districts of Eastern Bengal; but the Conference was unanimous in recommending that the section should be extended to the whole of the Presidency, and it has frequently been urged that the lack of a pure water-supply is so great an evil that the people generally would be prepared to make considerable sacrifices to remove it. Self-help and public spirit are essential to success in this campaign, and His Excellency in Council has every confidence that both zamindars and raiyats will co-operate on any lines that give a reasonable hope of progress. If District Boards enter into such agreements as have been suggested above and bear the initial cost of cleansing the tanks before handing them over to the existing Union Committees, it is only fair to expect these Committees to bear the cost of keeping the water pure, and it may be hoped that the example of public spirit shown by the Union Committees of the Howrah district will be widely followed in order that the immense boon of pure water may be secured to the villages concerned. Where there are no Union Committees the progress must necessarily be slower, but can still proceed upon the same lines. In most villages it may be possible to find one or more persons of sufficient influence and enlightenment to undertake the supervision of the village water-supply, though unless voluntary subscriptions can be raised or voluntary labour be enlisted, the maintenance of its purity must depend to a considerable extent on the possibility of obtaining financial assistance from the District or Local Boards.

The Conference referred to has made many other useful suggestions which are well worthy of consideration, and if necessary His Excellency hopes in due course to convene a larger conference to advise him further on the question. The most important of these suggestions are that any further increase in the resources of District Boards should to some extent be earmarked for expenditure on water-supply, and that even now each District Board should budget for a definite proportion of its income to be spent on this object, the money to be administered by a special Committee, preferably in each Local Board; and that District Boards should be empowered on the analogy of the provisions in the Municipal Act, to require owners of unhealthy tanks to clean or fill them up, and in default that the District Board should do the work and retain possession of the tank until the cost is refunded. It was also urged that in many districts the cost of excavation and maintenance of tanks could be met by the sale of fish, and that it would be profitable for District Boards or even private individuals to take loans from Government for this purpose. The opinion was further expressed that it might be desirable to empower Union Committees or other Committees in charge of village water-supplies or the village panchayat to impose and collect small fines up to a maximum of Re. 1 for offences leading to the contamination of these supplies.

The importance of the subject is admitted and His Excellency knows that it is fully recognised by all officers responsible for district administration. Spasmodic efforts are of little avail and real progress can only be made by continuous and sustained endeavour. The first essential to any systematic plan of campaign must be knowledge of existing facts, and it is to be feared that the registers of water-supply prescribed in 1896 are now of little use. It is not considered necessary that there should be a scientific water survey which would be very costly and might take 10 years to complete; but the broad facts as regards each village must be definitely ascertained and recorded, and His Excellency in Council is of opinion that such a record can only be made effective if it is linked to maps and village lists as proposed in the instructions issued by the late Government of Eastern Bengal and Assam. Separate orders will be issued regarding the preparation and maintenance of these records, but in order to ensure that the records shall be brought up to date at once Government is prepared to bear the cost of the appointment, where necessary, for one year, of a Sub-Overseer in each subdivision of the Province to visit every village and report on the real condition of the water-supply. There is no reason why all action should be suspended till these reports are completed; each District Board and each Union Committee should at once begin to work on the lines proposed above to increase the number of tanks at the disposal of the public for drinking-water and to preserve their purity, and His Excellency hopes that all concerned, officials and non-officials, zamindars and raiyats, will co-operate even at personal sacrifice to remove the reproach which rests upon the Presidency.

His Excellency fully realises that the measures now proposed are only the first step towards solving the problem, and that a long time may elapse and very large expenditure may be necessary before a complete solution is reached. Nevertheless, these measures are essential preliminaries to any further advance, and if successful will in themselves give considerable relief, and it is hoped that when they have been carried as far as is practicable some means may be found to enable the District Boards to complete the task.

III.—Admission to Government House will be by ticket only. Applications for tickets should be submitted to the Military Secretary's Office not later than 10th December, *after which date no applications will be received.* These same tickets will be made use of by the Military Secretary when reading the names to His Excellency the Governor and must consequently be brought to the Levee room. No other name cards will be required.

This rule will not apply to gentlemen who have the privilege of Private Entree, but they are requested to bring with them cards on which their names are typed or very clearly hand-printed.

IV.—Gentlemen, whether European or Indian, who have not already been presented at the Court of St. James or at the Viceregal Court or at the Courts of Governors of Madras and Bombay and who desire to be presented at His Excellency's Levee, should submit their applications through the gentlemen proposing to present them. The latter will apply to the Military Secretary to the Governor for a "form of presentation" which, after the necessary particulars have been filled in by the presentor, will be returned to the Military Secretary not later than Saturday, 7th December, in order that the names may be submitted to His Excellency, when, if they are approved, tickets of admission will be issued.

Gentlemen who present others must themselves attend the Levee.

In the case of all Government officials or gentlemen engaged in business, the presentor should ordinarily be the Head of the Department or Firm.

V.—Only those persons who are declared eligible on account of their social status will be permitted to attend.

VI.—Gentlemen who are entitled *ex-officio* to attend Provincial Durbars may be presented at His Excellency the Governor's Levee by the Heads of their Departments. This will not confer upon them the privilege of attending Levees after they have ceased to hold the position which made them eligible for presentation, nor will it entitle them to present other gentlemen.

VII.—Dress:—

(1) "the Act" means the Births, Deaths and Marriages Registration Act, 1886:

(2) "section" means a section of the Act:

(3) "schedule" means a schedule to these rules: and

(4) "Registrar-General" and "Registrar" mean, respectively, the Registrar-General of Births, Deaths and Marriages, Bengal, and a Registrar of Births and Deaths appointed under the Act.

2. Notices of births and deaths shall be in the forms set forth in Schedule A and Schedule B, respectively.

3. Every notice of a birth or death shall be signed by the person giving it, and shall specify the capacity in which such person claims to be authorized to give it.

4. (1) Any person giving notice of the birth of a legitimate child or of a death who wishes to be excused from personal attendance before the Registrar for the purpose of signing the register, may submit an application for the registration of such birth or death to the Registrar for the local area in which the birth or death occurred. Such applications shall be in the forms set forth in Schedules C and D respectively, and shall be submitted on a printed copy thereof, which may be obtained free of charge on application to the Registrar or to the Subdivisional Officer.

(2) The said forms shall be filled in and signed by the person giving notice and shall be forwarded to the Registrar. Provided that if the signature of such person is not known to the said Registrar, the same shall be attested by a respectable witness.

(3) On receipt of an application specified in sub-rule (1), the Registrar shall if he is personally acquainted with the signature of the applicant, or if such signature has been attested by a respectable witness under sub-rule (2), register the birth or death, and shall, in the column of the Register of Births or the Register of Deaths set apart for the signature of the person giving notice, make the following entry in lieu of such signature:—
"Registered under the provisions of section 22 (1) Proviso, of Act VI of 1886."

The registration of the birth or death shall thereupon be deemed to be valid for the purposes of the Act.

(4) All applications submitted for the registration of births and deaths under this rule shall be filed in the office of the Registrar and preserved in perpetuity.

6. (1) When a birth or death has occurred during a journey, or when the person giving notice of a birth or death was compelled by duty, or urgent necessity, or unavoidable accident, to leave the local area in which such birth or death occurred so soon after its occurrence that he was unable to give the prescribed notice to the Registrar for that local area, any Registrar may receive notice of such birth or death and register the same as if it were a birth or death which had occurred within the local area for which he has been appointed.

(2) The provisions of rule 5 as to the time within which notice of a birth or death must be given, shall apply to every notice of a birth or death given under the circumstances described in this rule.

(3) In every case of a birth or death admitted to registration under this rule the Registrar to whom the notice of the birth or death is given shall record in his register the reason why the notice was not given to the Registrar of the local area within which the birth or death occurred, and shall within one week from the date of the registration of such birth or death forward to the Registrar-General, and to the Registrar for the local area within which the birth or death occurred, a copy of the entry in the register relating to the birth or death.

(*b*) The Registrar-General on receiving certified copies of such entries in duplicate shall deal with one copy as provided in section 7, and forward the other copy to India Office, London.

12. The copies of entries of births and deaths which Registrars are required by section 24 to send to the Registrar-General shall be certified in the form set forth in Schedule I, and shall be sent at intervals of three months, on or as soon as possible after the 1st January, April, July and October in each year.

Should no entries be made in a register during any such interval of three months, a certificate to this effect shall be sent to the Registrar-General.

13. (1) The indexes which are required by section 7 to be made of the certified copies of registers of births, deaths and marriages sent to the office of the Registrar-General shall be in the forms set forth in Schedule J, Schedule K and Schedule L respectively.

(2) Every entry in an index shall be made alphabetically with reference to the initial letter of the name of the person indicated by the entry.

(3) In the index of certified copies of entries of marriages, the names of both the husband and the wife shall be indexed.

(4) In the case of a person of European or Armenian descent, the initial letter shall be the first letter of the surname, and in the case of any other person, the first letter of his name, and not that of his rank, title or class.

14. A Registrar may, of his own motion, correct, in the manner provided in section 28, any error in form made in an entry of a birth or death in a register kept by him under the Act.

In every case in which an entry is corrected under this rule, intimation thereof shall (if practicable) be communicated, within one week from the date of such correction, to the person who gave the notice of the birth or death.

15. (1) When an error in substance in any entry of a birth or death in a register kept by him is alleged to have been made, the Registrar may correct the error, in the manner provided in section 28 on application made in writing and signed in the presence of two witnesses attesting the signature, by any person authorised under section 20 or section 21, as the case may be, to give notice of the birth or death to which the entry relates:

Provided that the Registrar is satisfied that the application is well founded.

(2) An appeal against an order of a Registrar under this rule refusing to correct an alleged error in an entry in a register shall lie to the Registrar-General, who may, in his discretion, either confirm the order of the Registrar or direct him to correct the error.

16. Without the special sanction in writing of the Registrar-General, an application for the correction of an entry in a register of births or register of deaths shall not be entertained by the Registrar after the expiration of one year from the date on which the notice of the birth or death to which the entry relates was given.

RECEIPTS.

Fees under the Petroleum Act show an increase of Rs. 574 over the estimate. No judicial fines were realized under the Act and the sale-proceeds of unserviceable stores, horses, etc., show an increase of Rs. 164-12-7 over the estimate. The receipts during the year for hire of engine amount to Rs. 8,166, the net result being an actual increase in receipts over the estimate by Rs. 8,914-12-7.

EXPENDITURE.

(*a*) Under head "Establishment" there was a decrease of Rs. 16,696-12-9 as compared with the estimate. The decrease is due mainly to the following reasons:—

(*i*) Saving of Rs. 6,269-7-8 effected in the pay of the Assistant Engineers and the firemen. The savings were effected because the seven additional Assistant Engineers and the seven additional European firemen, whose appointment was sanctioned in Government Order No. 1037M., dated the 7th August 1911, were not entertained until the 1st October 1911, when the supplementary budget was passed by Government, although provision was made for them in the budget for seven months of the year.

(*ii*) Saving of Rs. 9,227-13-3 effected in the pay of khalasies. This was principally due to vacancies in the rank. Under the reorganization scheme the number of khalasies was increased from 90 to 145.

(*b*) The total expenditure under the head "Contingencies" amounted to Rs. 1,23,393-4-8, against a budget grant of Rs. 1,23,253, showing an increase of Rs. 140-4-8.

Out of the sum of Rs. 45,000 provided in the budget for 1910-11 for the purchase of motor-engine and motor-tender, the sum of Rs 25,915-9-3 remained unexpended on 31st March 1911, the price of the engine and tender not having been paid in full. During the year under notice the outstanding accounts were settled, leaving a balance of Rs. 13,418. Another motor-engine has accordingly been purchased at a cost of £894-10, but its price not paid before 31st March 1912.

The cost of construction of the new Garden Reach thana amounting to Rs. 5,189-4-9, provided for in the budget 1910-11, was paid during the year 1911-12.

The following sums provided in the budget of 1911-12 remained unexpended at the close of the year:—

(*i*) Rupees 6,500 for reconstruction of the Sibpur Fire Station, the Public Works Department having not taken up the work.

(*ii*) Rupees 2,900 on account of cost of two horse-drawn brakes, Government having sanctioned the purchase of a motor-*chassis* in place of them, the body being built at the Calcutta Fire-Brigade workshop.

(*c*) Under head "Other Charges" there was a decrease of Rs. 1,314-12-4, due mainly to savings under head "Water pressure."

The numerical strength of the Brigade at the end of the year under review is shown in Appendix I.

Considerable difficulty has been experienced during the year with the Indian staff. At the pay offered, Indians capable of carrying out the duties of a fireman cannot be recruited. At present, this section is about 50 under strength.

As a result of the deliberations of the Committee appointed to consider proposals for the reorganization of the Calcutta Fire-Brigade by a Bengal Government Resolution No. 211M., dated 28th January 1911, sanction was received to provisionally increase the strength by temporarily appointing seven Assistant Engineers, seven European Firemen, two mechanics, 55 khalassies, nine syces and one clerk, and the pay of the Chief Engineer, pending the appointment of a Chief Officer, was raised to Rs. 300. The permanent needs for the reorganization of the Brigade were postponed pending the appointment of a Chief Officer from England.

On the 27th November 1911, the Secretary of State for India in Council appointed Mr. Bernard A. Westbrook. Chief Officer of the Calcutta Fire-Brigade.

Mr. Westbrook arrived in Calcutta on the 10th February 1912, and has taken charge from that date. He is now preparing his report for the reorganization of the Fire Department which will shortly be completed.

4. *New fire appliances.*—On the 2nd May, a 85-horse-power Leyland Motor Turbine fire-engine. capable of delivering about 900 gallons per minute, was received. This engine is stationed at head-quarters and has proved to be extremely useful, and owing to its acquisition undoubtedly large fire loss has been saved. Two hand-drawn Valliant steam fire-engines, of about 260 gallons capacity, were also received during the year, and are now in commission at small out-stations On the 22nd March a 60-horse-power Commer Car fitted with a Simon's Positive Rotary Pump, capable of delivering about 450 gallons per minute, arrived. This appliance is fitted with a 40-feet portable telescope ladder, and is stationed at head-quarters. The principal fire-fighting appliances possessed by the Brigade and dispostion thereof are shown in Appendix II.

5. *Calls.*—Calls to the number of 157 were recorded during the year, being an increase of 20 over the previous year. Of these, 35 were serious fires in the town, river and docks, 26 in the suburbs, 12 in Howrah and 4 outside the jurisdiction of the Brigade.

There were 77 petty fires—24 in the town, river and docks, 49 in the suburbs and 4 in Howrah.

Nineteen of the total number of fires occurred in buildings or places licensed under the Licensed Warehouse and Fire-Brigrade Act, I of 1893.

The distance travelled to and from fires by the Brigade was about 314 miles. Seventy-three fires were attended by the Brigade during the year. The average distance travelled per fire was 4·301 miles.

The above figures include eight river and mill fires attended by the Brigade, assisted by the Port Commissioners' fire-float.

(2) *3rd November.*—A fire occurred at the Lansdowne Jute Mill, Dhakindari, district 24-Parganas, at which a godown containing jute to the value of Rs. 2,50,000 was destroyed.

(3) *19th December.*—A fire occurred at the South Baranagore Jute Mill, district 24-Parganas, at which a godown containing jute, valued at Rs. 3,00,000, was destroyed.

(4) *29th February.*—A fire occurred at Tollygunge Circular Road, partly within the Bengal Police jurisdiction and partly within our jurisdiction, at which a large bustee containing household effects, rice, oil, moodies and hop houses was destroyed to the value of Rs. 2,00,000. His Honour the Lieutenant-Governor of Bengal visited the scene of this fire about 6 P.M.

The total estimated value of the property destroyed by fire was Rs. 15,78,307, against Rs. 1,35,262-14 in the preceding year.

7. *Repairs.*—During the year under review no important repair work to the engines has been necessary. All petty repairs were done by the Fire-Brigade staff.

8. Two turn-outs, consisting of two motor-engines, three steam fire-engines, three hose-carts, three pair horse-brakes, one water-tower and fire-escape, with 24 horses and all necessary appliances are always kept in readiness at head-quarters in case of a call.

9. *Prosecutions.*—Four licenses were granted under section 36, Act I of 1893, to let off fire-works, rockets, etc., one person was convicted and fined for letting off fire-works under Act IV of 1884.

10. *Water-supply.*—The water used by the Brigade is obtained from the street mains within the jurisdiction of the Calcutta Corporation. The pressure maintained in these mains is inadequate for fire-fighting purposes, and the foreign substances in the water create difficulties as the Fire-Brigade pumps frequently get choked up when working for any length of time; it is, however, hoped that improvements will shortly be made. At Howrah, Cossipore-Chitpur, Garden Reach, and Maniktala where there is no unfilered water laid on, water has to be obtained from tanks and in some cases from the canal or river Hooghly direct; in these latter areas the work of the Fire-Brigade is seriously hampered.

11. *Telephones.*—At the head-quarters, Lall Bazar, there is a telephone exchange with 63 connections (and space for 37 more) to all Police, fire-stations, pumping-stations, Central Telegraph Office, Central Telephone Exchange, and also to the Port Commissioners' fire-float and East Indian Railway goods-sheds.

The East Indian Railway goods-sheds are in direct telephonic communication with Howrah fire-station and also have a fire alarm (the only one in Calcutta) at the fire-station. Besides the telephone for reporting fires, there are look-outs at all the fire-stations where steam or manual engines are kept.

At head-quarters and Howrah, tell-tale clocks continued to be used on the look-out towers as a check.

12. *Fatalities.*—During the year, six fatalities occurred at fires:—(1) At 108, China Bazar Street, a fire broke out in a four-storied building which was stocked with merchandise and celluloid. Many people were in the building, but owing to the delay in calling the Fire-Brigade and the difficulty in ascertaining the whereabouts of all the persons, five lives were lost. On the 29th January, the dead body of a boy, aged about 10 years, named Kudia was found amongst the jute after the fire was extinguished. It was not known that any persons were in the building, and there is no doubt that the boy was suffocated before the Brigade was called.

13. Attention must be called to the very unsatisfactory buildings at Lall Bazar which the Brigade now occupy, also to the non-existence of suitable method for calling the Fire-Brigade in case of fire. In numerous cases, serious delay has occurred.

During the visit of Their Majesties the King-Emperor and Queen, special precautions were taken for the protection of Government House against fire. Chief Engineer Phillips was presented with the Royal Victorian Medal for work done on this occasion.

14. *Miscellaneous.*—The construction of a workshop was completed during the year. The machinery is driven by electricity and this now enables the Fire-Brigade to do the majority of their own repairs, consequently a great saving of both time and money has been effected.

Frequent inspectons of all premises licensed under the Licensed Warehouse and Fire-Brigade Act have been carried out. This Department is considerably under-staffed, and it is hoped that it will be considerably strengthened, as its duties which consist of "Fire Prevention" are of great importance.

Owing to the fatal fire which occurred at 108, Old China Bazar Street, where celluloid was stored, the following Government Notification No. 609M., dated 25th March 1912, was issued—

In exercise of the power conferred by section 40 of the Licensed Warehouse and Fire-Brigade Act I of 1893 (Bengal Act I of 1893) and on the

recommendation of the Corporation of Calcutta made at a meeting, the Lieutenant-Governor in Council is pleased to declare that any building or place within the town of Calcutta used for the storing or keeping of celluloid in any form, shall be a warehouse within the meaning of, and shall be subject to the operation of, the said Act.

No. 500, dated Howrah, the 9th July 1912.

From—C. F. PAYNE, ESQ., I.C.S., Chairman, Howrah Municipality,

To—The Magistrate of Howrah.

WITH reference to your letter No. 853G., dated the 12th June 1912, I have the honour to submit herewith, in triplicate, the Annual Report on the working of the Licensed Warehouse and Fire-Brigade Act of 1893 for the year 1911-12.

Annual Fire-Brigade Report, 1911-12.

1. The assessment of warehouses under the Fire-Brigade Act was made as usual in accordance with the Budget submitted by the Commissioner of Police, but a supplementary budget was prepared during the course of the year to provide for the reorganization of the Brigade, and it was therefore found necessary to revise the rates of fees as follows:—

	Original fee.	Revised fee.		Original fee.	Revised fee.
	Per cent	Per cent.		Per cent.	Per cent.
Jute ...	2¾	3	Wood ...	2¾	3¼
Cotton ...	2	2¼	Other articles ...	1	1

2. The new rates were charged on all warehouses which were licensed after the month of September 1911 and not on the old ones, as their licenses had already been taken out. This accounts for the fact that only Rs. 7,268 was realised during the year out of a demand of Rs. 9,427.

3. There were ten cases of mutation of names under section 11 of the Fire-Brigade Act.

4. The fines under the Act amounted to Rs. 215 during the year under report.

5. There were thirteen outbreaks of fire which were extinguished by the Fire-Brigade. The most extensive of these took place at West's Press on Howrah Road, where the property destroyed was estimated at Rs. 1,25,000.

The list of fires, statement of receipts and disbursements, and schedule of licensed warehouses are appended.

No. 1158G., dated Howrah Magistracy, the 12th July 1912.

Memo. by—The Magistrate of Howrah.

COPY, with those of its enclosures in duplicate, forwarded to the Commissioner of the Burdwan Division for information.

* License fees not received during the year 1911-12

No. 148G.M., dated Calcutta, the 23rd July 1912.

From—H. M. PEAT, ESQ., Chairman, Garden Reach Municipality,
To—The Magistrate of the 24-Parganas.

WITH reference to your No. M. $\frac{2265}{1}$, dated the 18th instant, I have the honour to submit the following report on the working of the Licensed Jute Warehouse and Fire-Brigade Act in this municipality for the year 1911-12, together with statements I and II in the prescribed form.

2. During the year under report the total revenue from jute warehouse fees and from rate under section 25 (*b*) of the Fire-Brigade Act, as shown in Statement I, was Rs. 1,384. The amount of contribution paid in compliance with the requisitions made by the Commissioner of Police, Calcutta, was Rs. 4,707. There was thus a deficit of Rs. 3,323 which was met from the general fund of the municipality. The deficit was larger this year owing to the fact that the Commissioners waited for the decision of the Government regarding the extension of the provisions of the Fire-Brigade Act to the Rajabagan Dockyard, for which they could not complete the assessment of the warehouses in time and realize the fees in respect of some of them before 31st March last.

In levying the jute warehouse fees the limitations prescribed by the provisos to section 10 of the Fire-Brigade Act were strictly observed.

3. The rates at which the fees were levied were 5 per cent. on the annual value of all large warehouses, 10 per cent. on the annual value of all wood and straw depôts, and 1¼ per cent. on the annual value of all ***busti*** lands with huts, if any, on them. The rate was raised in order to meet the increased demand of the Commissioner of Police.

4. A list of licensed warehouses within the municipality during the year under review is given in statement II.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR OCTOBER 1912.

I. *Character of the season.*—During the month under review the rainfall was above the average everywhere throughout the province except in the districts of the 24-Parganas, Nadia, Murshidabad, Burdwan, Birbhum, Rajshahi and Malda, where it was a little below the normal. A statement showing the rainfall in the several districts of the province is appended.

II. *Progress of agricultural operations.*—The harvesting of *bhadoi* crops was completed and the preparation of land for *rabi* crops was continued. The outturn is reported to be good.

III. *State of standing crops.*—The condition of standing crops was generally fair; but more rain was wanted in the Presidency, Burdwan and Rajshahi Divisions and in Noakhali for the growth of winter rice.

IV. *Prospects and probable outturn of crops.*—The outturn of the *bhadoi* harvest has been fairly good in most districts. The prospects of the winter rice crop were generally good.

V. *Damage to crops.*—Some slight damage to winter rice by caterpillars and "ufra" disease was reported from Noakhali towards the end of the month, and the violent cyclonic storm which occurred at the end of the month levelled the crops in some fields with the ground. The total amount of damage done was, however, inconsiderable.

VI. *Condition of agricultural stock.*—The condition of agricultural stock was on the whole good. Cattle-disease was, however, reported to be prevalent in parts of the districts of the 24-Parganas, Jessore, Khulna, Hooghly, Rajshahi, Dinajpur, Malda, Tippera and the Chittagong Hill Tracts.

VII. *Failure of pasturage and fodder.*—The supply of fodder was sufficient throughout the province except in parts of Tippera, where scarcity of fodder was reported during the first week of the month.

VIII. *Prices of food-grains.*—During the second fortnight of the month under review the price of common rice rose in seven districts, fell in five and remained stationary in the rest. It varied from 7 seers a rupee in the Chittagong Hill Tracts to 10½ seers in Bankura.

IX. *Condition of agricultural people.*—The condition of the agricultural population continued to be satisfactory.
